

For a smooth manuscript review process, we would like to highly encourage you to provide us with a list of three possible reviewers for whom you most prefer to review your manuscript and another list of three possible reviewers for whom you least prefer to do so.

Preferred reviewer's name	Email address
1.	
2.	
3.	

Dispreferred reviewer's name	Email address
1.	
2.	
3.	

Note that this, of course, does not mean that your manuscript will be necessarily reviewed by some of the scholars listed in the first table. However, we will keep this information into serious account in implementing the reviewing process for your manuscript.

In order to set the manuscript peer review and publication fees, we also would like to kindly request the information for the following queries.

1. Author's name:

2. Academic position (e.g., graduate student, research worker, lecturer, professor):

3. Was this work funded?
